**MICHELIN**

RIDING A 2 WHEEL VEHICLE NECESSITATES FEELING CONFIDENT.

NOT TO MENTION SATISFYING DEMANDING CONSUMERS.

Michelin is proud to present its new 2013 offer, packed with new products and additional tire sizes, to respond better to the needs of your consumers:

New tire MICHELIN Power Supersport,  
New tire MICHELIN Pilot Power 3,  
New tire MICHELIN Anakee 3,  
New tire MICHELIN Pilot Street Radial,  
New tire MICHELIN Pilot Street,  
New tire MICHELIN Power Pure SC Radial,  
New tire MICHELIN Enduro VI rear.

Each of these new products will enhance performance in order to improve mobility. Michelin is in a strong position to take up this challenge, having rolled out cutting-edge technologies that have proved their worth on the track.

AT MICHELIN, WE CONTINUOUSLY PUSH SAFETY, RIDING PLEASURE AND LONGEVITY, ALL AT THE SAME TIME AND WITH NO TRADE-OFFS.

That's what we mean by MICHELIN Total Performance, which has always been and always will be our difference on every tire.

As another mark of confidence, the MICHELIN brand was awarded the 2012 «MOTORRAD Best Brand» prize for the third year running.

## LADOUX : the heart of MICHELIN Research and Innovation

Concentrated expertise :

- 3400 people
- More than 350 different specialized jobs

450 ha surface, among which :

- 380 ha of test tracks,
- zones d'accès et terrains cultivés
- 79 buildings on 169.400 m<sup>2</sup>
- 19 test tracks on a length of 41 km
- The site is confidential and certified ISO 14001

## Michelin RDI (Research Development Industrialization)

Innovation is one of the essential values of the Company and is in the heart of its jobs and processes.

- 6000 people worldwide
- 592 millions Euros annual budget

Michelin RDI gives the Group a unique position and allows the right response to the moving needs of the markets.

75% of MICHELIN tyres are designed and developed in Technological center of Ladoux

Ladoux offers numerous facilities:

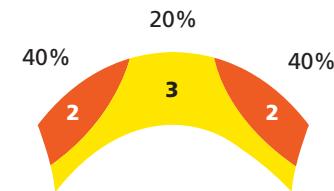

- Technical Directions for all Product Lines
- Technical Direction for Materials
- Research and Development Laboratories
- Tests and measures on tracks and machines
- Information Systems expertise: simulation, analyse and measuring tools
- Production of prototype envelopes
- Conception and production of prototype molds
- Associated support departments (supply chain, quality, finance, personnel, Information Systems, etc.)

### **The new 2CT generation !**

Hard rubber underneath the soft rubber on the shoulder. Better rigidity on the camber. More stability when cornering, especially under strong acceleration.

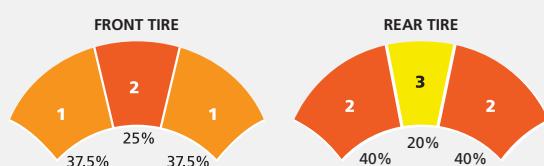

HARDNESS OF THE GUM    SOFT    1 ← → 2 ← → 3 MEDIUM

### **MICHELIN 2CT dual-compound technology**

successfully accomplishes two conflicting ideals: wear resistance in the centre of the tread, and grip on the shoulders.

### **MICHELIN XST X-Sipe Technology**

offers more grip on wet road, thanks to its patented sipes and its incorporated reservoirs, allowing more water to be evacuated.

### **PST : Progressive Sipe Technology**

Full-depth sipes which break up the water's surface film, no matter how much the tread is worn and a gradual increase in the number of sipes in contact with the ground as you lean into turns.

### **NST : Near Slick Technology**

With less than 5% of grooving ratio (the cut portion of the tread), it is close to a slick. The surface of rubber on the ground is important, ensuring a flawless grip and angles up to 60 °.

### **ADT : Amplified Density Technology**

A highly dense, more-rigid tire casing, which helps deliver excellent feedback and handling. Aramid tread plies on the rear tire resist centrifugal growth, reduce weight and provide excellent stability.

### **SRT : Silica Rain Technology**

Silica Rain Technology improves grip in cooler temperatures and on wet pavement, without compromising tread life.

### **SCT : Synthetic Component Technology**

Synthetic MRSE (MICHELIN Racing Synthetic Elastomers) rubber compounds in conjunction with HTSC resins (High Tech Synthetic Compound) promote ultra-fast warm-up, allowing you to put a knee down as soon as the first corner.

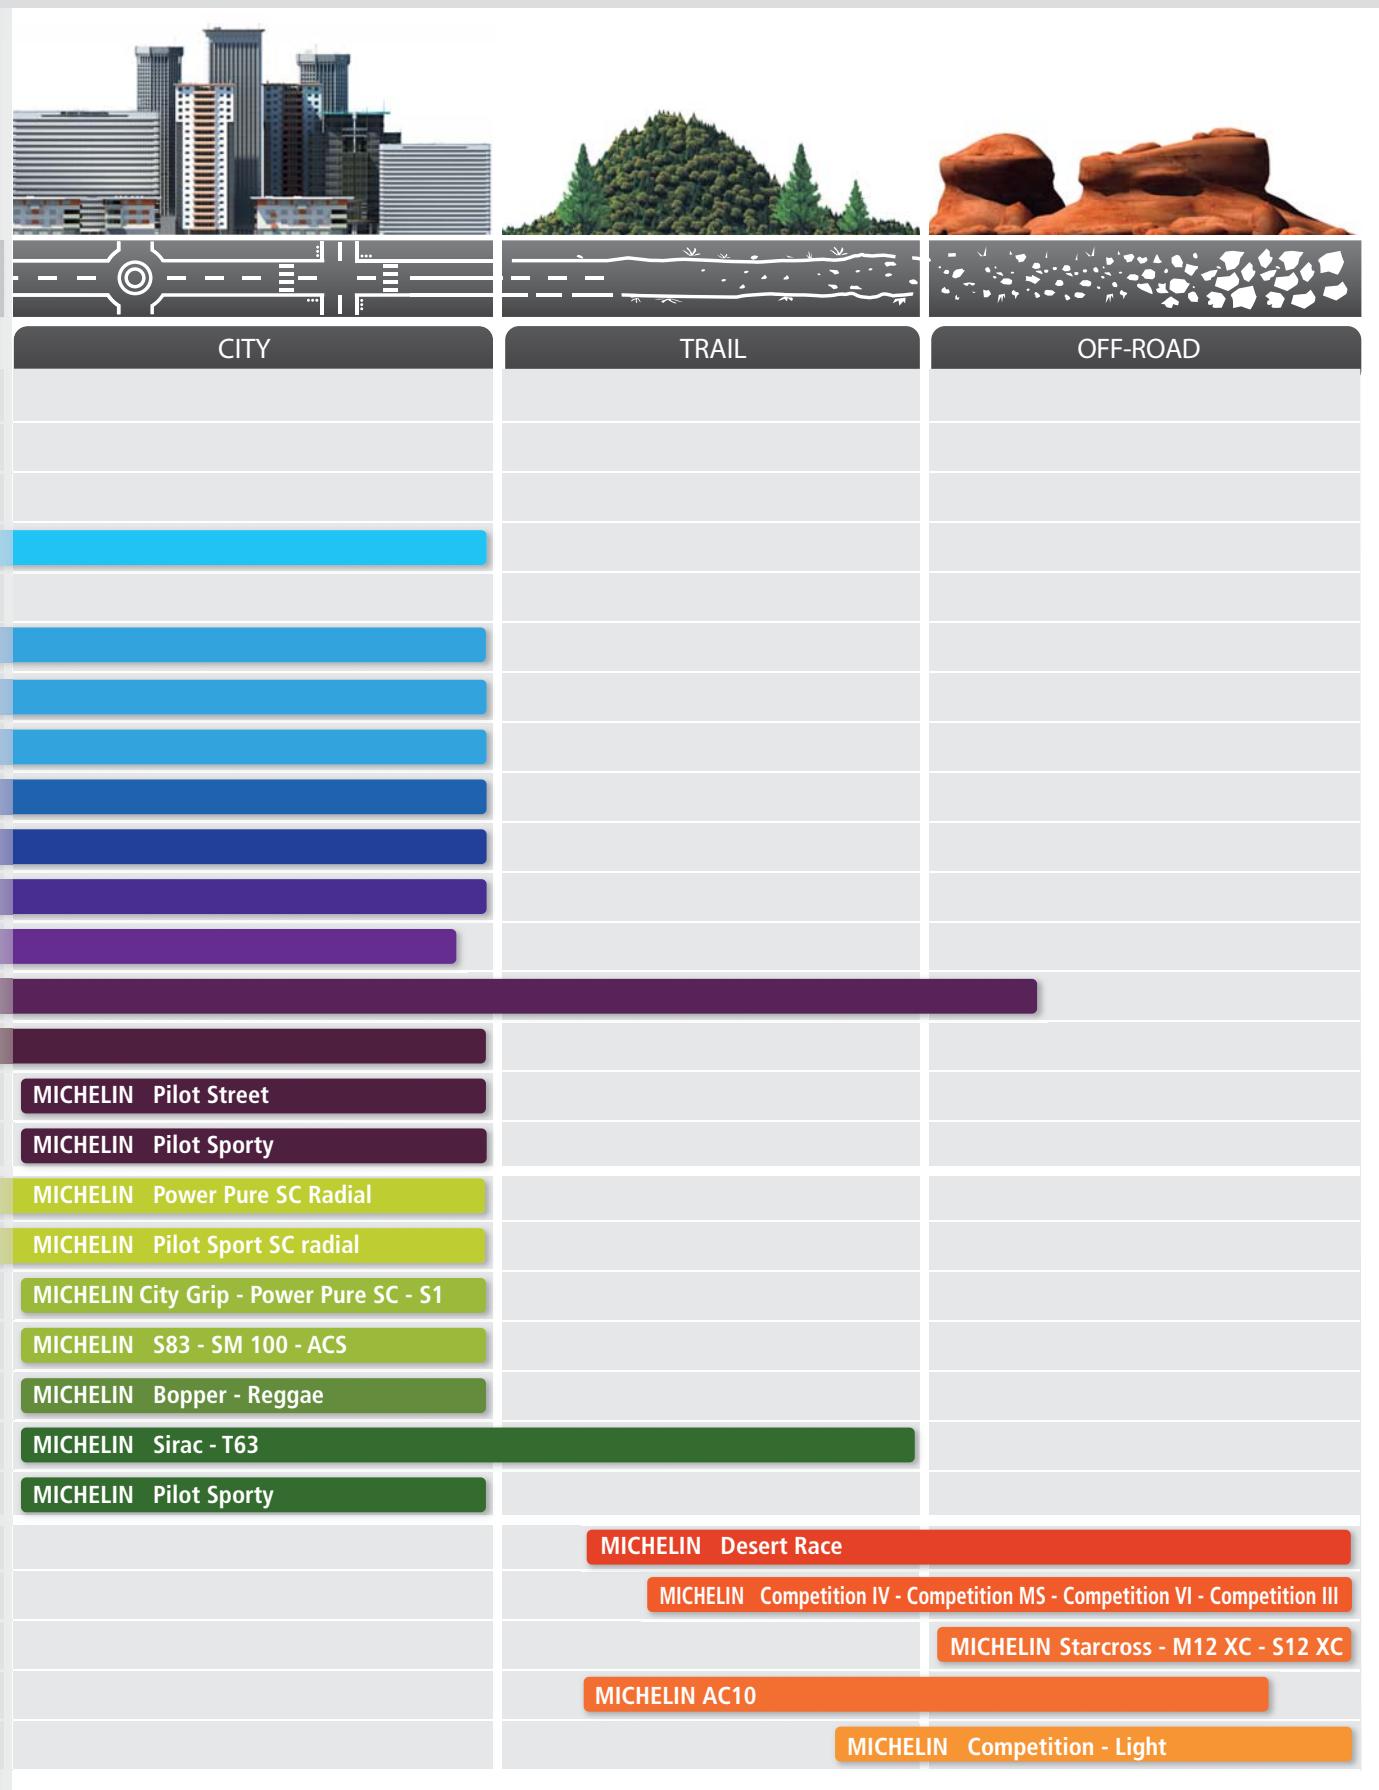

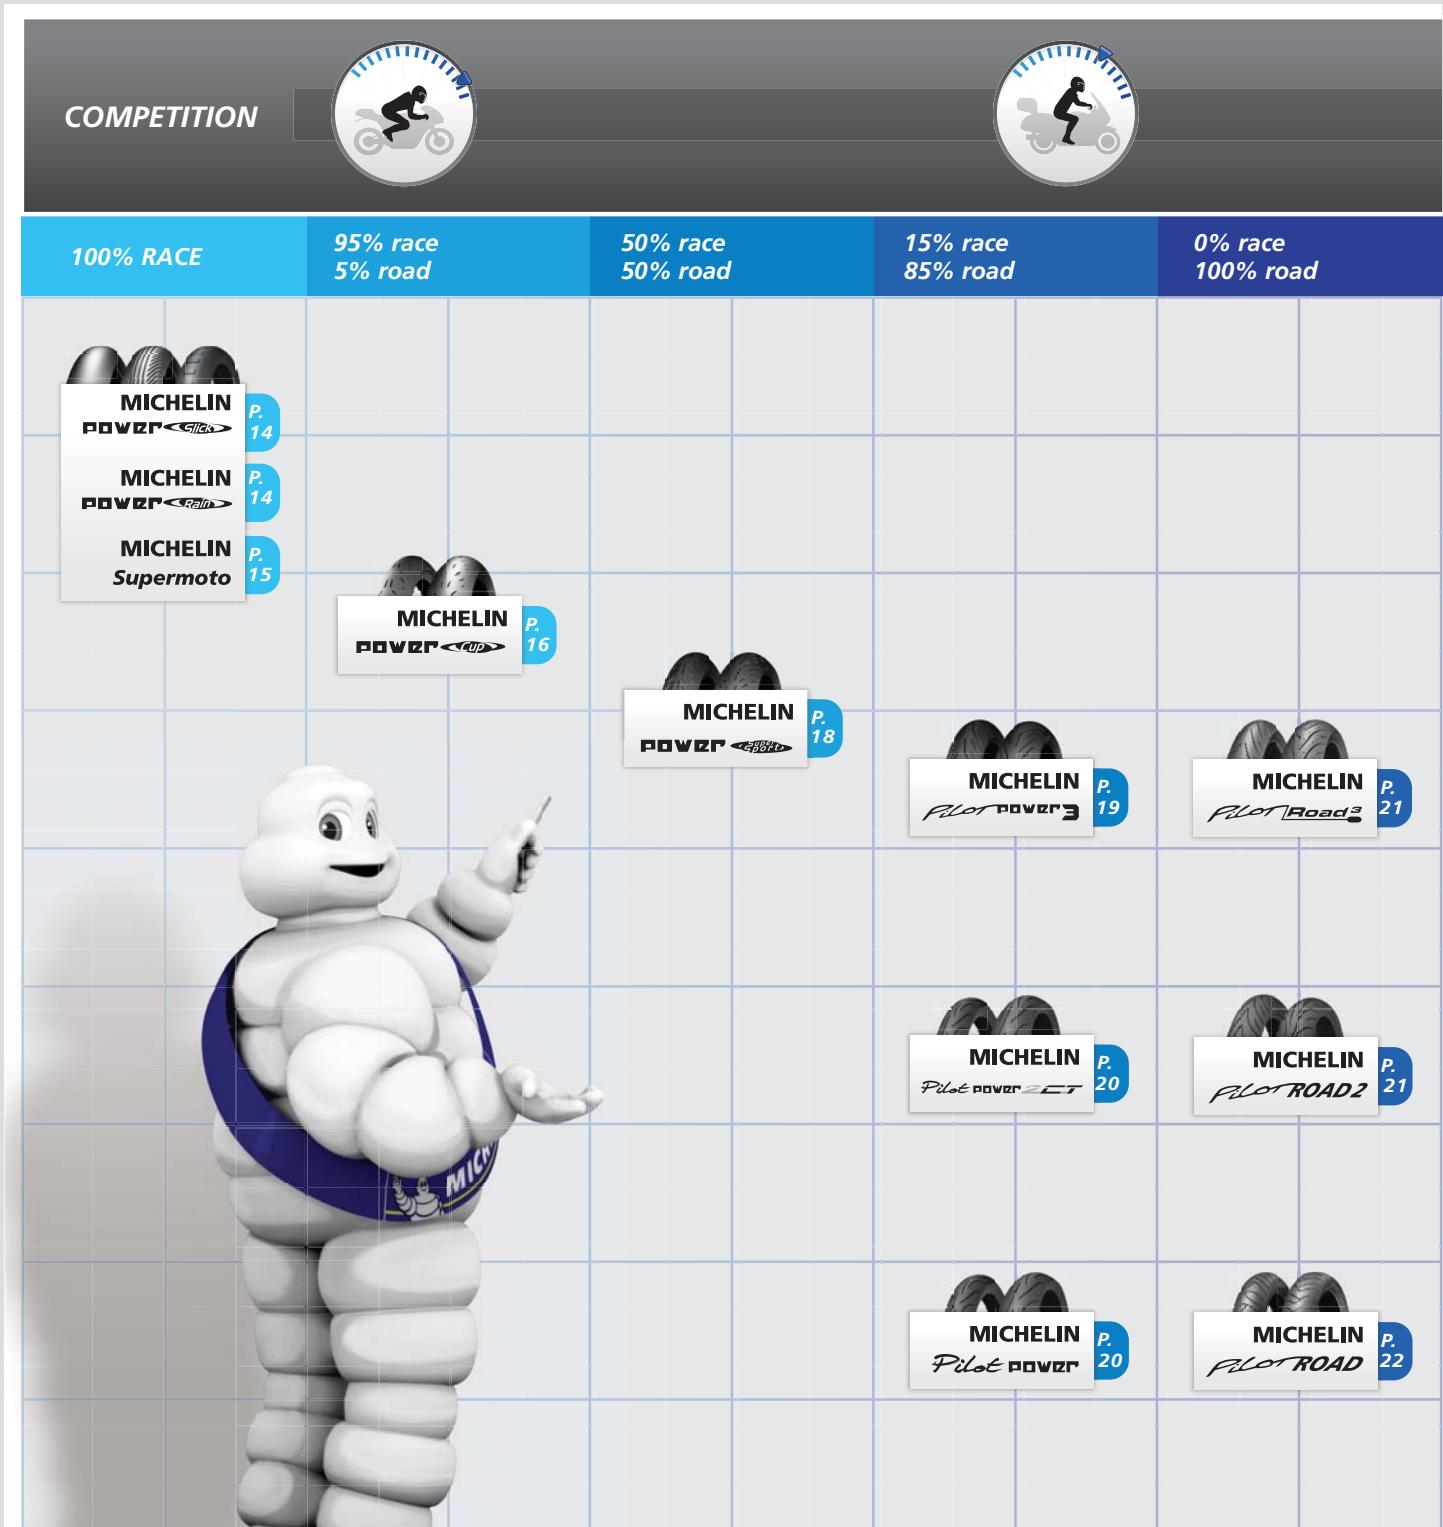

### **MCP : Maximized Contact Patch**

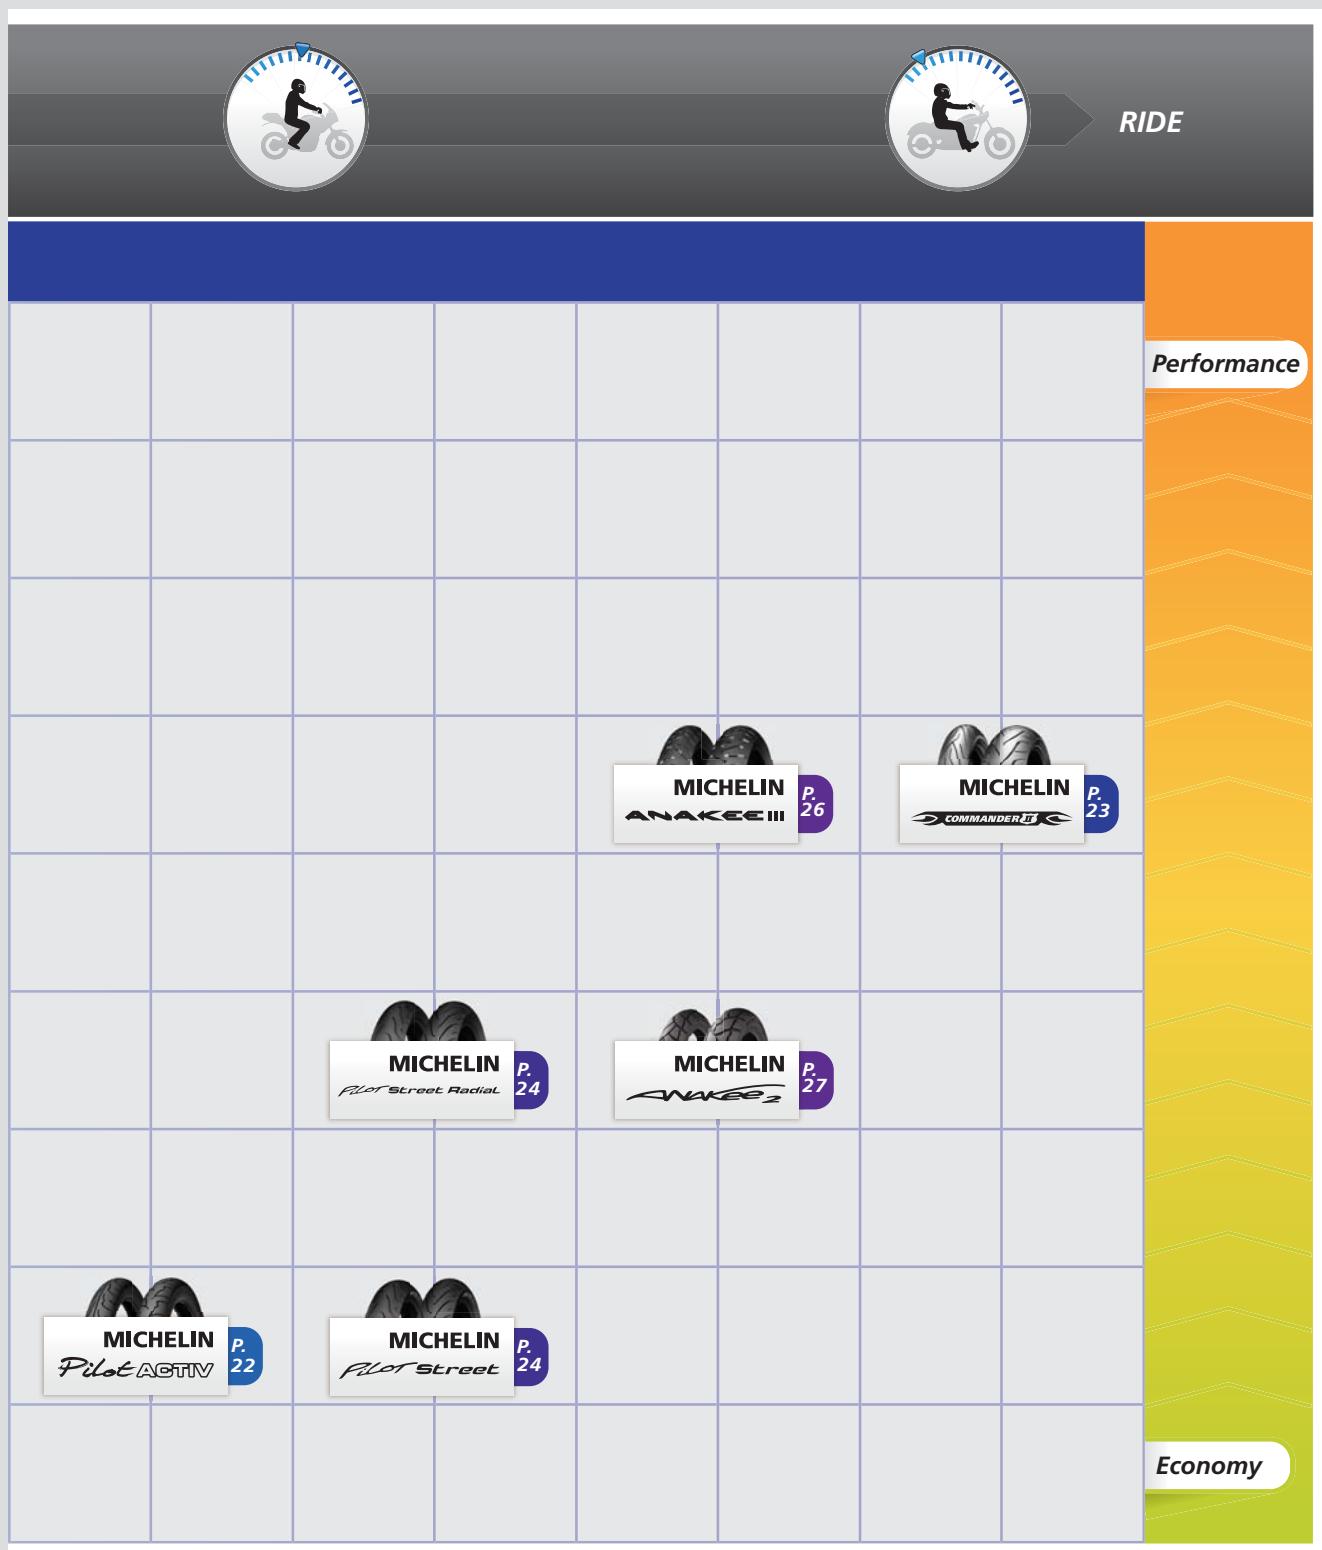

With a new competition carcass with more plies, the tire is more rigid and the area contact is increased.

The bike is much more stable at the front, which allows to overshoot on angle earlier and take the brakes later.

Bol d'Or 2012, Monster Energy YART, Igor JERMAN

## Innovation accessible to all motorcyclists

Innovation is Michelin's driving force. One of the objectives of the French tyre manufacturer is to accelerate the availability of innovations in order to meet the expectations and needs of customers thanks to the very latest technological advances. If a technology used in competition is considered useful to all motorcyclists it will be tested over a period of between one and two years in competition before being put into development.

8 H DE DOHA 2012 TEAM MONSTER YART HAGA

## Competition to serve innovation

With a score of 360 MotoGP wins and 26 world titles between 1976 to 2008, plus 14 Endurance world titles and 13 wins in the Le Mans 24 Hours and the Bol d'Or, Michelin has developed leading-edge motorcycle tyre expertise.

Competition is embedded in Michelin's DNA and serves as a technological laboratory that stimulates innovation.

Bol d'Or 2012 - YAMAHA FRANCE

## Carrying over know how from the race track to the street

This synergy of Research & Development teams brings a greater understanding of tyres by :

- using extreme conditions to validate innovations,
- experience shared on the ground, in international competition,
- regular debriefings
- a shared technical language.

Michelin has always proposed tyres whose uncompromising performance balance delivers grip, consistency and versatility.

## Michelin : Innovation in Competition applied to Series

**1974**

1st slick tire in GP500

**1980**

1st MICHELIN tires semi-slick : TF11/TG22

**1984**

1st radial tire in GP500

**1987**

1st MICHELIN radial tires in series : A59X/M59X

**1992**

1er tire with silica in GP500

**1999**

1st MICHELIN 100% silica in series : MICHELIN Pilot Sport

**2002**

New synthetic components in MotoGP tires

**2004**

1st mass-produced MICHELIN tire to use so many components derived from the world of racing : MICHELIN Pilot Power

**1994**

1st two-compound tire in GP500

**2005**

1st two-compound MICHELIN Racing tire homologated for road : **MICHELIN Power Race**

**2006**

1st MICHELIN Hypersport tire two compound 2CT : **MICHELIN Pilot Power 2CT**

**2007**

1st MICHELIN Sport-Touring tire two compound 2CT : **MICHELIN Pilot Road 2**

**2012**

1st Scooter tire two compound 2CT : **MICHELIN Power Pure SC**

**2013**

1st MICHELIN tire with 2CT+ : **MICHELIN Pilot Power 3** and **MICHELIN Power SuperSport**

**1994**

1st asymmetrical tire in GP500

**2009**

1st MICHELIN asymmetrical tire in series : **MICHELIN Power One**

**MICHELIN****COMMANDER II***More mileage with no compromise*

- A new standard in longevity: a rear Michelin Commander II tire can last up to 40,000 km\*. That's almost double the mileage of our direct competitors\*!
- No compromises in handling or stability
- All with an innovative, groundbreaking new look

\* Tests conducted in 2011, comparing MICHELIN Commander II, Metzeler ME880 and Dunlop 407/408 tires in sizes 130/80B17 (front) and 180/65B16 (rear). Individual results may vary depending on motorcycle type and operating conditions.

## MICHELIN Bibmousse

### The MICHELIN solution in puncture situation

- Invented by Michelin for Cross Country Rally, Enduro and Motocross use
- Winner of the Dakar Rally an unparalleled 29 victories since 1982!
- Lighter than a reinforced inner tube
- Equivalent to an inflation pressure of 0.9 bar
- Eliminates the drawbacks associated with punctures.
- Not for use on the public highway. Only to be used in conjunction with MICHELIN off-road competition tires.

## MICHELIN AND PIAGGIO

Michelin, partner of PIAGGIO  
Group brands

PIAGGIO X10

*The best of Sport touring radial motorcycle tire technology for maxi-scooters*

- Excellent grip thanks to 2CT technology: hard rubber in the center to withstand sudden accelerations and braking, and soft on the edges to maximize lean angles
- A tire architecture directly inspired by our Sport touring motorcycle ranges, offering increased stability on the straight and on bends for greater safety
- Excellent handling and smooth cornering thanks to its sports profile: pure riding pleasure

Grip

+ Longevity

**MICHELIN**  
**CIT4 GRIP**

*The first MICHELIN scooter tire to feature PST\**

- MICHELIN's Progressive Sipe Technology (PST) helps prevent sliding on wet roads and on hazards such as manhole covers.
- An extensive range that covers the majority of the market's 125cc and bigger engined scooters, including big-wheeled models
- Chosen by the world's most prestigious scooter manufacturers (more than 65 standard fitments!).

\* MICHELIN PST: Progressive Sipe Technology
